IRF3 Antibody – Rabbit Polyclonal

PRODUCT OVERVIEW

Product Name	IRF3, Polyclonal Antibody
Full Product Name	Anti-IRF3 Antibody
Product Gene Name	anti-IRF3 antibody
Product Synonym Names	Interferon regulatory factor 3; IRF-3
Clonality	Polyclonal
Host	Rabbit
Species Reactivity	Human
Form/Format	Liquid in 0.42% Potassium phosphate, 0.87% Sodium chloride, pH 7.3, 30% glycerol, and 0.01% sodium azide.
Purity/Purification	The antibody was purified by affinity chromatography.
Specificity	Recognizes endogenous levels of IRF3 protein.
Preparation and Storage	Shipped at 4 degree C. Upon delivery aliquot and store at -20 degree C for one year. Avoid freeze/thaw cycles.
Antibody/Peptide Pairs	IRF3 peptide (MBS8248021) is used for blocking the activity of IRF3 antibody (MBS8248309)
Molecular Weight	12,330 Da
OMIM	603734
3D Structure	ModBase 3D Structure for Q14653
Immunogen	KLH-conjugated synthetic peptide encompassing a sequence within the C-term region of human IRF3. The exact sequence is proprietary.
Applications Tested/Suitable for anti-IRF3 antibody	Western Blot (WB), Immunohistochemistry (IHC)
Application Notes for anti-IRF3 antibody	WB: 1/500 - 1/2000; Immunohistochemistry: 1/50 - 1/200
Related Product Information for anti-IRF3 antibody	MBS8248309 is an antibody targeting IRF3. Reactive in Human. Host: Rabbit. Rabbit polyclonal antibody to IRF3
Other Notes	Small volumes of anti-IRF3 antibody vial(s) may occasionally become entrapped in the seal of the product vial during shipment and storage. If necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the container`s cap. Certain products may require to ship with dry ice and additional dry ice fee may apply.

Western Blot (WB) of anti-IRF3 antibody
Western blot analysis of IRF3 expression in Hela (A) whole cell lysates.

Immunohistochemistry (IHC) of anti-IRF3 antibody
Immunohistochemical analysis of IRF3 staining in human kidney formalin fixed paraffin embedded tissue section. The section was pre-treated using heat mediated antigen retrieval with sodium citrate buffer (pH 6.0). The section was then incubated with the antibody at room temperature and detected using an HRP conjugated compact polymer system. DAB was used as the chromogen. The section was then counterstained with haematoxylin and mounted with DPX.

ADDITIONAL DETAILS

NCBI/Uniprot data below describe general gene information for IRF3. It may not necessarily be applicable to this product.

NCBI GI #	308199446
NCBI GeneID	3661
NCBI Accession #	NP_001184051.1
UniProt Primary Accession #	Q14653
UniProt Secondary Accession #	Q5FBY1; Q5FBY2; Q5FBY4; Q7Z5G6; A8K7L2; B2RAZ3
UniProt Related Accession #	Q14653
GenBank Nucleotide #	NM_001197122.1
NCBI Official Full Name	interferon regulatory factor 3 isoform 2
NCBI Official Synonym Full Names	interferon regulatory factor 3
NCBI Official Symbol	IRF3
NCBI Official Synonym Symbols	IIAE7
UniProt Protein Name	Interferon regulatory factor 3
Protein Family	Interferon regulatory factor
UniProt Gene Name	IRF3
UniProt Synonym Gene Names	IRF-3
UniProt Entry Name	IRF3_HUMAN
NCBI Protein Information	interferon regulatory factor 3
NCBI Summary for IRF3	This gene encodes a member of the interferon regulatory transcription factor (IRF) family. The encoded protein is found in an inactive cytoplasmic form that upon serine/threonine phosphorylation forms a complex with CREBBP. This complex translocates to the nucleus and activates the transcription of interferons alpha and beta, as well as other interferon-induced genes. Alternatively spliced transcript variants encoding multiple isoforms have been observed for this gene. [provided by RefSeq, Nov 2011]

UniProt Comments for IRF3	IRF3: interferon regulatory factor 3, a member of the interferon regulatory transcription factor (IRF) family. IRF3 is found in an inactive cytoplasmic form that upon serine/threonine phosphorylation forms a complex with CREBBP. This complex translocates to the nucleus and activates the transcription of interferons alpha and beta, as well as other interferon-induced genes. Protein type: DNA-binding; Transcription factor Chromosomal Location of Human Ortholog: 19q13.3-q13.4 Cellular Component: cytoplasm; cytosol; nucleoplasm; nucleus Molecular Function: identical protein binding; protein binding; protein homodimerization activity; transcription cofactor activity Biological Process: apoptosis; defense response to virus; negative regulation of interferon type I production; positive regulation of interferon type I production; positive regulation of interferon-alpha production; positive regulation of interferon-beta production; response to DNA damage stimulus; transcription from RNA polymerase II promoter Disease: Herpes Simplex Encephalitis, Susceptibility To, 7
Research Articles on IRF3	**1.** FAF1 plays a novel role in negatively regulating virus-induced IFN-beta production and the antiviral response by inhibiting the translocation of active, phosphorylated IRF3 from the cytosol to the nucleus
Precautions	All of MyBioSource's Products are for scientific laboratory research purposes and are not for diagnostic, therapeutics, prophylactic or in vivo use. Through your purchase, you expressly represent and warrant to MyBioSource that you will properly test and use any Products purchased from MyBioSource in accordance with industry standards. MyBioSource and its authorized distributors reserve the right to refuse to process any order where we reasonably believe that the intended use will fall outside of our acceptable guidelines.
Disclaimer	While every efforts were made to ensure the accuracy of the information provided in this datasheet, MyBioSource will not be liable for any omissions or errors contained herein. MyBioSource reserves the right to make changes to this datasheet at any time without prior notice. It is the responsibility of the customer to report product performance issues to MyBioSource within 30 days of receipt of the product. Please visit our Terms & Conditions page for more information.
Product Note	Select online data sheet information is drawn from bioinformatics databases, occasionally resulting in ambiguous or non-relevant product information. It is the responsibility of the customer to review, verify, and evaluate the information to make sure it matches their requirements before purchasing the kit. Our ELISA Kit assays are dynamic research tools and sometimes they may be updated and improved. If the format of this assay is important to you then please request the current manual or contact our technical support team with a presales inquiry before placing an order. We will confirm the current details of the assay. We cannot guarantee the sample manual posted online is the most current manual, it is intended to serve as an example only. Please refer to the instructions For Use provided with the assay kit for precise details.

For Research Use Only. Not for use in diagnostic or therapeutic procedures.
