ATXN1 ELISA Kit for Human

PRODUCT OVERVIEW

Product Name	ATXN1, ELISA Kit
Full Product Name	Human ATXN1 ELISA Kit
Product Gene Name	ATXN1 elisa kit
Species Reactivity	Human
Detection Range	0.31-20ng/mL
Sensitivity	0.19ng/mL
Preparation and Storage	An unopened kit can be stored at 2-8 degree C for 1 month unless otherwise specified in the kit documetation. If the kit is not supposed to be used within 1 month, store the components separately upon receipt according to the directions accompanying the kit.
Detection Target	ATXN1
Related Product Information for ATXN1 elisa kit	Human ATXN1 ELISA Kit is a highly sensitive sandwich enzyme-linked immunoassay (ELISA) for measuring ATXN1 in serum, plasma and other biological fluids. Reagents for up to 96 tests. This ELISA Kit uses the Sandwich-ELISA principle. The micro ELISA plate provided in this Kit has been pre-coated with an antibody specific to Human ATXN1. Samples (or Standards) are added to the micro ELISA plate wells and combined with the specific antibody. Then a biotinylated detection antibody specific for Human ATXN1 and Avidin-Horseradish Peroxidase (HRP) conjugate are added successively to each micro plate well and incubated. Free components are washed away. The substrate solution is added to each well. Only those wells that contain Human ATXN1, biotinylated detection antibody and Avidin-HRP conjugate will appear blue in color. The enzyme-substrate reaction is terminated by the addition of stop solution and the color turns yellow. The optical density (OD) is measured spectrophotometrically at a wavelength of 450 +/- 2 nm. The OD value is proportional to the concentration of Human ATXN1. You can calculate the concentration of Human ATXN1 in the samples by comparing the OD of the samples to the standard curve.
Other Notes	Small volumes of ATXN1 elisa kit vial(s) may occasionally become entrapped in the seal of the product vial during shipment and storage. If necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the container`s cap. Certain products may require to ship with dry ice and additional dry ice fee may apply.
Searchable Terms for ATXN1 purchase	MBS8427062 is a ready-to-use microwell, strip-or-full plate ELISA (enzyme-linked immunosorbent assay) Kit for analyzing the presence of the ATXN1, ELISA Kit target analytes in biological samples. The concentration gradients of the kit standards or positive controls render a theoretical kit detection range in biological research samples containing ATXN1. The ELISA analytical biochemical technique of the MBS8427062 kit is based on ATXN1 antibody-ATXN1 antigen interactions (immunosorbency) and an HRP colorimetric detection system to detect ATXN1 antigen targets in samples. The ELISA Kit is designed to detect native, not recombinant, ATXN1. Appropriate sample types may include undiluted body fluids and/or tissue homogenates, secretions. Quality control assays assessing reproducibility identified the intra-assay CV (%) and inter-assay CV(%).

ADDITIONAL DETAILS

NCBI/Uniprot data below describe general gene information for ATXN1. It may not necessarily be applicable to this product.

Protein Family	Ataxin
Precautions	All of MyBioSource's Products are for scientific laboratory research purposes and are not for diagnostic, therapeutics, prophylactic or in vivo use. Through your purchase, you expressly represent and warrant to MyBioSource that you will properly test and use any Products purchased from MyBioSource in accordance with industry standards. MyBioSource and its authorized distributors reserve the right to refuse to process any order where we reasonably believe that the intended use will fall outside of our acceptable guidelines.

Disclaimer	While every efforts were made to ensure the accuracy of the information provided in this datasheet, MyBioSource will not be liable for any omissions or errors contained herein. MyBioSource reserves the right to make changes to this datasheet at any time without prior notice. It is the responsibility of the customer to report product performance issues to MyBioSource within 30 days of receipt of the product. Please visit our Terms & Conditions page for more information.
Product Note	Select online data sheet information is drawn from bioinformatics databases, occasionally resulting in ambiguous or non-relevant product information. It is the responsibility of the customer to review, verify, and evaluate the information to make sure it matches their requirements before purchasing the kit. Our ELISA Kit assays are dynamic research tools and sometimes they may be updated and improved. If the format of this assay is important to you then please request the current manual or contact our technical support team with a presales inquiry before placing an order. We will confirm the current details of the assay. We cannot guarantee the sample manual posted online is the most current manual, it is intended to serve as an example only. Please refer to the instructions For Use provided with the assay kit for precise details.

For Research Use Only. Not for use in diagnostic or therapeutic procedures.
