NOS3 Antibody – Rabbit Polyclonal

PRODUCT OVERVIEW

Product Name	NOS3, Polyclonal Antibody
Full Product Name	NOS3 Rabbit pAb
Product Gene Name	anti-NOS3 antibody
Product Synonym Names	eNOS; ECNOS
Clonality	Polyclonal
Isotype	IgG
Host	Rabbit
Species Reactivity	Human, Mouse
Form/Format	PBS with 0.02% Sodium Azide, 50% Glycerol, pH 7.3.
Purity/Purification	Affinity Purified
Preparation and Storage	Store at -20 degree C. Avoid freeze/thaw cycles.
Molecular Weight	140kDa
OMIM	163729
3D Structure	ModBase 3D Structure for P29474
Immunogen	Recombinant fusion protein containing a sequence corresponding to amino acids 1-120 of human NOS3 (NP_000594.2).
Cellular Localization	Cell Membrane, Cytoplasm, Cytoskeleton, Golgi Apparatus, Membrane
ISO Certification	Manufactured in an ISO 9001:2015 Certified Laboratory.
Applications Tested/Suitable for anti-NOS3 antibody	Western Blot (WB)
Application Notes for anti-NOS3 antibody	WB: 1:500-1:2000
Related Product Information for anti-NOS3 antibody	Produces nitric oxide (NO) which is implicated in vascular smooth muscle relaxation through a cGMP-mediated signal transduction pathway. NO mediates vascular endothelial growth factor (VEGF)-induced angiogenesis in coronary vessels and promotes blood clotting through the activation of platelets.Isoform eNOS13C: Lacks eNOS activity, dominant-negative form that may down-regulate eNOS activity by forming heterodimers with isoform 1.
Other Notes	Small volumes of anti-NOS3 antibody vial(s) may occasionally become entrapped in the seal of the product vial during shipment and storage. If necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the container`s cap. Certain products may require to ship with dry ice and additional dry ice fee may apply.
Searchable Terms for NOS3 purchase	MBS8544438 is an antibody targeting NOS3. Also known as NOS3 Rabbit pAb. Reactive in Human, Mouse. Host: Rabbit.

ADDITIONAL DETAILS

NCBI/Uniprot data below describe general gene information for NOS3. It may not necessarily be applicable to this product.

NCBI GI #	40254422
NCBI GeneID	4846

NCBI Accession #	NP_000594.2
UniProt Primary Accession #	P29474
UniProt Related Accession #	P29474
GenBank Nucleotide #	NP_000594.2
NCBI Official Full Name	nitric oxide synthase, endothelial isoform 1
NCBI Official Synonym Full Names	nitric oxide synthase 3
NCBI Official Symbol	NOS3
NCBI Official Synonym Symbols	eNOS; ECNOS
UniProt Protein Name	Nitric oxide synthase, endothelial
UniProt Synonym Protein Names	Constitutive NOS; cNOS; EC-NOS; Endothelial NOS; eNOS; NOS type III
Protein Family	Nitric oxide synthase
UniProt Gene Name	NOS3
UniProt Synonym Gene Names	cNOS; eNOS; NOSIII
UniProt Entry Name	NOS3_HUMAN
NCBI Protein Information	nitric oxide synthase, endothelial
NCBI Summary for NOS3	Nitric oxide is a reactive free radical which acts as a biologic mediator in several processes, including neurotransmission and antimicrobial and antitumoral activities. Nitric oxide is synthesized from L-arginine by nitric oxide synthases. Variations in this gene are associated with susceptibility to coronary spasm. Alternative splicing and the use of alternative promoters results in multiple transcript variants. [provided by RefSeq, Oct 2016]
UniProt Comments for NOS3	eNOS: endothelial constitutive nitric oxide synthase. Synthesizes nitric oxide (NO) from arginine and oxygen, which is implicated in vascular smooth muscle relaxation through a cGMP-mediated signal transduction pathway. NO mediates vascular endothelial growth factor (VEGF)-induced angiogenesis in coronary vessels and promotes blood clotting through the activation of platelets. Induced in humans by caloric restriction. Stimulated by calcium/calmodulin. Inhibited by NOSIP and NOSTRIN. Protein type: EC 1.14.13.39; Oxidoreductase; Amino Acid Metabolism - arginine and proline Chromosomal Location of Human Ortholog: 7q36 Cellular Component: Golgi membrane; cytoskeleton; cytoplasm; plasma membrane; caveola; nucleus; cytosol Molecular Function: calmodulin binding; actin monomer binding; protein binding; FAD binding; FMN binding; NADPH-hemoprotein reductase activity; nitric-oxide synthase activity; iron ion binding; heme binding; NADP binding; cadmium ion binding Biological Process: regulation of systemic arterial blood pressure by endothelin; negative regulation of potassium ion transport; negative regulation of muscle hyperplasia; positive regulation of vasodilation; nitric oxide metabolic process; negative regulation of cell proliferation; negative regulation of hydrolase activity; regulation of blood pressure; regulation of the force of heart contraction by chemical signal; lipopolysaccharide-mediated signaling pathway; angiogenesis; negative regulation of blood pressure; regulation of blood vessel size; nitric oxide biosynthetic process; mitochondrion organization and biogenesis; interaction with host; negative regulation of calcium ion transport; in utero embryonic development; positive regulation of guanylate cyclase activity; regulation of sodium ion transport; ovulation from ovarian follicle; positive regulation of angiogenesis; response to heat; endothelial cell migration; arginine catabolic process; blood vessel remodeling; regulation of nitric-oxide synthase activity; vascular endothelial growth factor receptor signaling pathway; blood coagulation; nitric oxide mediated signal transduction; lung development; smooth muscle hyperplasia Disease: Preeclampsia/eclampsia 1; Alzheimer Disease; Hypertension, Essential; Stroke, Ischemic
Research Articles on NOS3	**1.** Features of nitric oxide metabolism and risk of developing endothelial dysfunction in children with eNOS 4a/4b polymorphism under long-term entering cesium-137 to body have been presented.

Precautions	All of MyBioSource's Products are for scientific laboratory research purposes and are not for diagnostic, therapeutics, prophylactic or in vivo use. Through your purchase, you expressly represent and warrant to MyBioSource that you will properly test and use any Products purchased from MyBioSource in accordance with industry standards. MyBioSource and its authorized distributors reserve the right to refuse to process any order where we reasonably believe that the intended use will fall outside of our acceptable guidelines.
Disclaimer	While every efforts were made to ensure the accuracy of the information provided in this datasheet, MyBioSource will not be liable for any omissions or errors contained herein. MyBioSource reserves the right to make changes to this datasheet at any time without prior notice. It is the responsibility of the customer to report product performance issues to MyBioSource within 30 days of receipt of the product. Please visit our Terms & Conditions page for more information.
Product Note	Select online data sheet information is drawn from bioinformatics databases, occasionally resulting in ambiguous or non-relevant product information. It is the responsibility of the customer to review, verify, and evaluate the information to make sure it matches their requirements before purchasing the kit. Our ELISA Kit assays are dynamic research tools and sometimes they may be updated and improved. If the format of this assay is important to you then please request the current manual or contact our technical support team with a presales inquiry before placing an order. We will confirm the current details of the assay. We cannot guarantee the sample manual posted online is the most current manual, it is intended to serve as an example only. Please refer to the instructions For Use provided with the assay kit for precise details.

For Research Use Only. Not for use in diagnostic or therapeutic procedures.
