GLRB Antibody – Rabbit Polyclonal

PRODUCT OVERVIEW

Product Name	GLRB, Polyclonal Antibody
Full Product Name	GLRB Polyclonal Antibody
Product Gene Name	anti-GLRB antibody
Clonality	Polyclonal
Isotype	IgG
Host	Rabbit
Species Reactivity	Human, Mouse, Rat
Form/Format	PBS with 0.02% sodium azide, 50% glycerol, pH 7.3.
Purity/Purification	Affinity Purification
Preparation and Storage	Store at -20 degree C. Avoid freeze/thaw cycles.
Molecular Weight	34kDa; 56kDa
OMIM	138492
3D Structure	ModBase 3D Structure for P48167
Immunogen	Recombinant protein of human GLRB (NP_000815.1).
ISO Certification	Manufactured in an ISO 9001:2015 Certified Laboratory.
Applications Tested/Suitable for anti-GLRB antibody	Western Blot (WB)
Application Notes for anti-GLRB antibody	WB: 1:1000-1:2000
Related Product Information for anti-GLRB antibody	This gene encodes the beta subunit of the glycine receptor, which is a pentamer composed of alpha and beta subunits. The receptor functions as a neurotransmitter-gated ion channel, which produces hyperpolarization via increased chloride conductance due to the binding of glycine to the receptor. Mutations in this gene cause startle disease, also known as hereditary hyperekplexia or congenital stiff-person syndrome, a disease characterized by muscular rigidity. Alternative splicing results in multiple transcript variants.
Other Notes	Small volumes of anti-GLRB antibody vial(s) may occasionally become entrapped in the seal of the product vial during shipment and storage. If necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the container`s cap. Certain products may require to ship with dry ice and additional dry ice fee may apply.
Searchable Terms for GLRB purchase	MBS8566550 is an antibody targeting GLRB. Also known as GLRB Polyclonal Antibody. Reactive in Human, Mouse, Rat. Host: Rabbit.

ADDITIONAL DETAILS

NCBI/Uniprot data below describe general gene information for GLRB. It may not necessarily be applicable to this product.

NCBI GI #	4504023
NCBI GeneID	2743
NCBI Accession #	NP_000815.1
UniProt Primary Accession #	P48167

UniProt Related Accession #	P48167
GenBank Nucleotide #	NP_000815.1
NCBI Official Full Name	glycine receptor subunit beta isoform A
NCBI Official Synonym Full Names	glycine receptor beta
NCBI Official Symbol	GLRB
NCBI Official Synonym Symbols	HKPX2
UniProt Protein Name	Glycine receptor subunit beta
UniProt Synonym Protein Names	Glycine receptor 58 kDa subunit
Protein Family	Glycine receptor
UniProt Gene Name	GLRB
UniProt Entry Name	GLRB_HUMAN
NCBI Protein Information	glycine receptor subunit beta
UniProt Comments for GLRB	GLRB: The glycine receptor is a neurotransmitter-gated ion channel. Binding of glycine to its receptor increases the chloride conductance and thus produces hyperpolarization (inhibition of neuronal firing). Defects in GLRB are the cause of hyperekplexia type 2 (HKPX2). HKPX2 is a neurologic disorder characterized by muscular rigidity of central nervous system origin, particularly in the neonatal period, and by an exaggerated startle response to unexpected acoustic or tactile2 stimuli. Belongs to the ligand-gated ion channel (TC 1.A.9) family. Glycine receptor (TC 1.A.9.3) subfamily. GLRB sub- subfamily. Protein type: Membrane protein, multi-pass; Transporter, ion channel; Transporter; Membrane protein, integral; Channel, ligand-gated Chromosomal Location of Human Ortholog: 4q31.3 Cellular Component: postsynaptic membrane; integral to plasma membrane; plasma membrane; cell junction Molecular Function: protein binding; extracellular-glycine-gated chloride channel activity; glycine binding; extracellular-glycine-gated ion channel activity; drug binding Biological Process: nervous system development; startle response; synaptic transmission, glycinergic; righting reflex; protein heterooligomerization; acrosome reaction; adult walking behavior; synaptic transmission; regulation of membrane potential; visual perception; neuropeptide signaling pathway; ion transport; transmembrane transport Disease: Hyperekplexia 2
Research Articles on GLRB	**1.** The association between the missense SNP rs2235371 in gene IRF6 and NSCL/P suggests that this SNP may play an important role as a risk factor for NSCL/P in the Han Chinese populations.
Precautions	All of MyBioSource's Products are for scientific laboratory research purposes and are not for diagnostic, therapeutics, prophylactic or in vivo use. Through your purchase, you expressly represent and warrant to MyBioSource that you will properly test and use any Products purchased from MyBioSource in accordance with industry standards. MyBioSource and its authorized distributors reserve the right to refuse to process any order where we reasonably believe that the intended use will fall outside of our acceptable guidelines.
Disclaimer	While every efforts were made to ensure the accuracy of the information provided in this datasheet, MyBioSource will not be liable for any omissions or errors contained herein. MyBioSource reserves the right to make changes to this datasheet at any time without prior notice. It is the responsibility of the customer to report product performance issues to MyBioSource within 30 days of receipt of the product. Please visit our Terms & Conditions page for more information.

Product Note	Select online data sheet information is drawn from bioinformatics databases, occasionally resulting in ambiguous or non-relevant product information. It is the responsibility of the customer to review, verify, and evaluate the information to make sure it matches their requirements before purchasing the kit. Our ELISA Kit assays are dynamic research tools and sometimes they may be updated and improved. If the format of this assay is important to you then please request the current manual or contact our technical support team with a presales inquiry before placing an order. We will confirm the current details of the assay. We cannot guarantee the sample manual posted online is the most current manual, it is intended to serve as an example only. Please refer to the instructions For Use provided with the assay kit for precise details.

For Research Use Only. Not for use in diagnostic or therapeutic procedures.
