MIP-1alpha ELISA Kit for Human

PRODUCT OVERVIEW

Product Name	MIP-1alpha, ELISA Kit
Full Product Name	Human MIP-1alpha (CCL3) ELISA Kit
Product Gene Name	MIP-1alpha elisa kit
Species Reactivity	Human
Assay Type	Sandwich ELISA
Samples	Serum, Plasma, Cell culture supernatant
Detection Range	31.25-2000pg/ml
Sensitivity	15pg/ml
Preparation and Storage	Store at 4 degree C Shipping: Gel Ice
ISO Certification	Manufactured in an ISO 9001:2015 Certified Laboratory.
Related Product Information for MIP-1alpha elisa kit	MBS8579177 is a ready-to-use microwell, strip-or-full plate ELISA (enzyme-linked immunosorbent assay) Kit for analyzing the presence of the MIP-1alpha, ELISA Kit target analytes in biological samples. The concentration gradients of the kit standards or positive controls render a theoretical kit detection range in biological research samples containing MIP-1alpha. The ELISA analytical biochemical technique of the MBS8579177 kit is based on MIP-1alpha antibody-MIP-1alpha antigen interactions (immunosorbency) and an HRP colorimetric detection system to detect MIP-1alpha antigen targets in samples. The ELISA Kit is designed to detect native, not recombinant, MIP-1alpha. Appropriate sample types may include undiluted body fluids and/or tissue homogenates, secretions. Quality control assays assessing reproducibility identified the intra-assay CV (%) and inter-assay CV(%).
Other Notes	Small volumes of MIP-1alpha elisa kit vial(s) may occasionally become entrapped in the seal of the product vial during shipment and storage. If necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the container`s cap. Certain products may require to ship with dry ice and additional dry ice fee may apply.

For Research Use Only. Not for use in diagnostic or therapeutic procedures.
