CDC25C Antibody – Rabbit Polyclonal

PRODUCT OVERVIEW

Product Name	CDC25C, Polyclonal Antibody
Full Product Name	Phospho-CDC25C (Ser198) Rabbit pAb
Product Gene Name	anti-CDC25C antibody
Clonality	Polyclonal
Isotype	IgG
Host	Rabbit
Species Reactivity	Human
Form/Format	Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide, pH 7.3.
Purity/Purification	Affinity Purified
Preparation and Storage	Store at 4 degree C short term. Aliquot and store at -20 degree C long term. Avoid freeze/thaw cycles.
Molecular Weight	53,365 Da
Chromosome Location	Chromosome: 5; NC_000005.9 (137620959..137667516, complement). Location: 5q31
OMIM	157680
3D Structure	ModBase 3D Structure for P30307
Immunogen	Synthetic peptide of human CDC25C
Product Categories/Family for anti-CDC25C antibody	Primary Antibody
ISO Certification	Manufactured in an ISO 9001:2015 Certified Laboratory.
Applications Tested/Suitable for anti-CDC25C antibody	Immunohistochemistry-Paraffin (IHC-P)
Application Notes for anti-CDC25C antibody	IHC: 1:50-1:100
Related Product Information for anti-CDC25C antibody	MBS8597171 is an antibody targeting CDC25C. Also known as Phospho-CDC25C (Ser198) Rabbit pAb. Reactive in Human. Host: Rabbit.
Other Notes	Small volumes of anti-CDC25C antibody vial(s) may occasionally become entrapped in the seal of the product vial during shipment and storage. If necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the container`s cap. Certain products may require to ship with dry ice and additional dry ice fee may apply.

ADDITIONAL DETAILS

NCBI/Uniprot data below describe general gene information for CDC25C. It may not necessarily be applicable to this product.

NCBI GI #	125625350
NCBI GeneID	995
NCBI Accession #	NP_001781.2
UniProt Primary Accession #	P30307

UniProt Secondary Accession #	Q96PL3; Q9H168; Q9H2E8; Q9H2E9; Q9H2F1; D3DQB8
UniProt Related Accession #	P30307
GenBank Nucleotide #	NM_001790.3
NCBI Official Full Name	M-phase inducer phosphatase 3 isoform a
NCBI Official Synonym Full Names	cell division cycle 25C
NCBI Official Symbol	CDC25C
NCBI Official Synonym Symbols	CDC25; PPP1R60
UniProt Protein Name	M-phase inducer phosphatase 3
UniProt Synonym Protein Names	Dual specificity phosphatase Cdc25C
UniProt Gene Name	CDC25C
UniProt Entry Name	MPIP3_HUMAN
NCBI Protein Information	M-phase inducer phosphatase 3; mitosis inducer CDC25; phosphotyrosine phosphatase; dual specificity phosphatase CDC25C; protein phosphatase 1, regulatory subunit 60
NCBI Summary for CDC25C	This gene is highly conserved during evolution and it plays a key role in the regulation of cell division. The encoded protein is a tyrosine phosphatase and belongs to the Cdc25 phosphatase family. It directs dephosphorylation of cyclin B-bound CDC2 and triggers entry into mitosis. It is also thought to suppress p53-induced growth arrest. Multiple alternatively spliced transcript variants of this gene have been described, however, the full-length nature of many of them is not known. [provided by RefSeq, Jul 2008]
UniProt Comments for CDC25C	CDC25C: a member of the MPI phosphatase family. Activates the cyclin dependent kinase CDC2 by removing two phosphate groups and it is required for entry into mitosis. Shuttles between the nucleus and the cytoplasm due to nuclear localization and nuclear export signals. The protein is nuclear in the M and G1 phases of the cell cycle and moves to the cytoplasm during S and G2. CDC25B has oncogenic properties, although its role in tumor formation has not been determined. At least four transcript variants for this gene exist. Three splice variant isoforms have been described. Protein type: Motility/polarity/chemotaxis; EC 3.1.3.48; Protein phosphatase, dual-specificity Chromosomal Location of Human Ortholog: 5q31 Cellular Component: nucleoplasm; perinuclear region of cytoplasm; nucleus; cytosol Molecular Function: protein binding; WW domain binding; protein tyrosine phosphatase activity; protein kinase binding Biological Process: cell proliferation; mitosis; viral reproduction; regulation of cell cycle; cell division; regulation of mitosis; spermatogenesis; regulation of cyclin-dependent protein kinase activity; mitotic cell cycle; DNA replication; G2/M transition of mitotic cell cycle
Research Articles on CDC25C	**1.** dose-dependent Cdc25c phosphatase acts as an early G2-phase checkpoint, thus indicating mechanistic importance in the low-dose hyper-radiosensitivity and induced radioresistance transition
Precautions	All of MyBioSource's Products are for scientific laboratory research purposes and are not for diagnostic, therapeutics, prophylactic or in vivo use. Through your purchase, you expressly represent and warrant to MyBioSource that you will properly test and use any Products purchased from MyBioSource in accordance with industry standards. MyBioSource and its authorized distributors reserve the right to refuse to process any order where we reasonably believe that the intended use will fall outside of our acceptable guidelines.
Disclaimer	While every efforts were made to ensure the accuracy of the information provided in this datasheet, MyBioSource will not be liable for any omissions or errors contained herein. MyBioSource reserves the right to make changes to this datasheet at any time without prior notice. It is the responsibility of the customer to report product performance issues to MyBioSource within 30 days of receipt of the product. Please visit our Terms & Conditions page for more information.

Product Note	Select online data sheet information is drawn from bioinformatics databases, occasionally resulting in ambiguous or non-relevant product information. It is the responsibility of the customer to review, verify, and evaluate the information to make sure it matches their requirements before purchasing the kit. Our ELISA Kit assays are dynamic research tools and sometimes they may be updated and improved. If the format of this assay is important to you then please request the current manual or contact our technical support team with a presales inquiry before placing an order. We will confirm the current details of the assay. We cannot guarantee the sample manual posted online is the most current manual, it is intended to serve as an example only. Please refer to the instructions For Use provided with the assay kit for precise details.

For Research Use Only. Not for use in diagnostic or therapeutic procedures.
