Ultrasensitive Growth Hormone (UGH) ELISA Kit for Goose

PRODUCT OVERVIEW

Product Name	Ultrasensitive Growth Hormone (UGH), ELISA Kit
Full Product Name	Goose Ultrasensitive Growth Hormone (UGH) ELISA Kit
Product Gene Name	UGH elisa kit
Species Reactivity	Goose
Preparation and Storage	Store all reagents at 2-8 degree C
Related Product Information for UGH elisa kit	MBS9368973 is a ready-to-use microwell, strip-or-full plate ELISA (enzyme-linked immunosorbent assay) Kit for analyzing the presence of the Ultrasensitive Growth Hormone (UGH) ELISA Kit target analytes in biological samples. The concentration gradients of the kit standards or positive controls render a theoretical kit detection range in biological research samples containing UGH. The ELISA analytical biochemical technique of the MBS9368973 kit is based on UGH antibody-UGH antigen interactions (immunosorbency) and an HRP colorimetric detection system to detect UGH antigen targets in samples. The ELISA Kit is designed to detect native, not recombinant, UGH. Appropriate sample types may include undiluted body fluids and/or tissue homogenates, secretions. Quality control assays assessing reproducibility identified the intra-assay CV (%) and inter-assay CV(%).
Other Notes	Small volumes of UGH elisa kit vial(s) may occasionally become entrapped in the seal of the product vial during shipment and storage. If necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the container`s cap. Certain products may require to ship with dry ice and additional dry ice fee may apply.

For Research Use Only. Not for use in diagnostic or therapeutic procedures.
