| **Related Product Information for COLL2-1 elisa kit** | MBS9394912 is a ready-to-use microwell, strip-or-full plate ELISA (enzyme-linked immunosorbent assay) Kit for analyzing the presence of the COLL2-1 (COLL2-1) ELISA Kit target analytes in biological samples. The concentration gradients of the kit standards or positive controls render a theoretical kit detection range in biological research samples containing COLL2-1. The ELISA analytical biochemical technique of the MBS9394912 kit is based on COLL2-1 antibody-COLL2-1 antigen interactions (immunosorbency) and an HRP colorimetric detection system to detect COLL2-1 antigen targets in samples. The ELISA Kit is designed to detect native, not recombinant, COLL2-1. Appropriate sample types may include undiluted body fluids and/or tissue homogenates, secretions. Quality control assays assessing reproducibility identified the intra-assay CV (%) and inter-assay CV(%). |
| **Other Notes** | Small volumes of COLL2-1 elisa kit vial(s) may occasionally become entrapped in the seal of the product vial during shipment and storage. If necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the container`s cap. Certain products may require to ship with dry ice and additional dry ice fee may apply. |

**For Research Use Only.** Not for use in diagnostic or therapeutic procedures.
