FGF-18 Antibody – Rabbit Polyclonal

PRODUCT OVERVIEW

Product Name	FGF-18, Polyclonal Antibody
Full Product Name	FGF-18 Polyclonal Antibody
Product Gene Name	anti-FGF-18 antibody
Product Synonym Names	FGF18; Fibroblast growth factor 18; FGF-18; zFGF5
Clonality	Polyclonal
Host	Rabbit
Species Reactivity	Human, Mouse, Rat
Form/Format	Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.
Purity/Purification	The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen.
Concentration	1 mg/ml (lot specific)
Specificity	FGF-18 Polyclonal Antibody detects endogenous levels of FGF-18 protein.
Preparation and Storage	Store at -20 degree C/1 year
Molecular Weight	23,989 Da
OMIM	603726
3D Structure	ModBase 3D Structure for O76093
Immunogen Type	peptide
Immunogen Description	Synthesized peptide derived from the C-terminal region of human FGF-18.
Target Name	FGF-18
Product Categories/Family for anti-FGF-18 antibody	Total protein Ab
Applications Tested/Suitable for anti-FGF-18 antibody	Western Blot (WB), ELISA (EIA)
Application Notes for anti-FGF-18 antibody	Western Blot: 1:500 - 1:2000 ELISA: 1:20000 Not yet tested in other applications.
Related Product Information for anti-FGF-18 antibody	MBS9414204 is an antibody targeting FGF-18. Also known as FGF-18 Polyclonal Antibody. Reactive in Human, Mouse, Rat. Host: Rabbit.
Other Notes	Small volumes of anti-FGF-18 antibody vial(s) may occasionally become entrapped in the seal of the product vial during shipment and storage. If necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the container`s cap. Certain products may require to ship with dry ice and additional dry ice fee may apply.

Western Blot (WB) of anti-FGF-18 antibody
Western Blot analysis of SW480 SKOV3 BT474 mouse heart cells using FGF-18 Polyclonal Antibody

ADDITIONAL DETAILS

NCBI/Uniprot data below describe general gene information for FGF-18. It may not necessarily be applicable to this product.

NCBI GI #	4503695
NCBI GeneID	8817
NCBI Accession #	NP_003853.1
UniProt Primary Accession #	O76093
UniProt Secondary Accession #	Q6UWF1; D3DQL7
UniProt Related Accession #	O76093
GenBank Nucleotide #	NM_003862.2
NCBI Official Full Name	fibroblast growth factor 18
NCBI Official Synonym Full Names	fibroblast growth factor 18
NCBI Official Symbol	FGF18
NCBI Official Synonym Symbols	ZFGF5; FGF-18
UniProt Protein Name	Fibroblast growth factor 18
UniProt Synonym Protein Names	zFGF5
Protein Family	Fibroblast growth factor
UniProt Gene Name	FGF18
UniProt Synonym Gene Names	FGF-18
UniProt Entry Name	FGF18_HUMAN
NCBI Protein Information	fibroblast growth factor 18
NCBI Summary for FGF-18	The protein encoded by this gene is a member of the fibroblast growth factor (FGF) family. FGF family members possess broad mitogenic and cell survival activities, and are involved in a variety of biological processes, including embryonic development, cell growth, morphogenesis, tissue repair, tumor growth, and invasion. It has been shown in vitro that this protein is able to induce neurite outgrowth in PC12 cells. Studies of the similar proteins in mouse and chick suggested that this protein is a pleiotropic growth factor that stimulates proliferation in a number of tissues, most notably the liver and small intestine. Knockout studies of the similar gene in mice implied the role of this protein in regulating proliferation and differentiation of midline cerebellar structures. [provided by RefSeq, Jul 2008]

UniProt Comments for FGF-18	FGF18: Plays an important role in the regulation of cell proliferation, cell differentiation and cell migration. Required for normal ossification and bone development. Stimulates hepatic and intestinal proliferation. Belongs to the heparin-binding growth factors family. Protein type: Secreted; Secreted, signal peptide; Cytokine Chromosomal Location of Human Ortholog: 5q34 Cellular Component: extracellular space; extracellular region; nucleolus Molecular Function: growth factor activity; type 2 fibroblast growth factor receptor binding; type 1 fibroblast growth factor receptor binding Biological Process: epidermal growth factor receptor signaling pathway; nervous system development; intramembranous ossification; regulation of endothelial cell proliferation; anatomical structure morphogenesis; fibroblast growth factor receptor signaling pathway; phosphoinositide-mediated signaling; nerve growth factor receptor signaling pathway; chondrocyte development; signal transduction; positive regulation of vascular endothelial growth factor receptor signaling pathway; positive regulation of MAP kinase activity; positive regulation of chondrocyte differentiation; cell-cell signaling; positive regulation of cell proliferation; insulin receptor signaling pathway; innate immune response; angiogenesis; endochondral ossification; lung development
Research Articles on FGF-18	**1.** The position of sulfate ions bound to FGF18 provides insight into the putative HS-binding site and allows comparison with the prototypical FGFs, FGF1, and FGF2.
Precautions	All of MyBioSource's Products are for scientific laboratory research purposes and are not for diagnostic, therapeutics, prophylactic or in vivo use. Through your purchase, you expressly represent and warrant to MyBioSource that you will properly test and use any Products purchased from MyBioSource in accordance with industry standards. MyBioSource and its authorized distributors reserve the right to refuse to process any order where we reasonably believe that the intended use will fall outside of our acceptable guidelines.
Disclaimer	While every efforts were made to ensure the accuracy of the information provided in this datasheet, MyBioSource will not be liable for any omissions or errors contained herein. MyBioSource reserves the right to make changes to this datasheet at any time without prior notice. It is the responsibility of the customer to report product performance issues to MyBioSource within 30 days of receipt of the product. Please visit our Terms & Conditions page for more information.
Product Note	Select online data sheet information is drawn from bioinformatics databases, occasionally resulting in ambiguous or non-relevant product information. It is the responsibility of the customer to review, verify, and evaluate the information to make sure it matches their requirements before purchasing the kit. Our ELISA Kit assays are dynamic research tools and sometimes they may be updated and improved. If the format of this assay is important to you then please request the current manual or contact our technical support team with a presales inquiry before placing an order. We will confirm the current details of the assay. We cannot guarantee the sample manual posted online is the most current manual, it is intended to serve as an example only. Please refer to the instructions For Use provided with the assay kit for precise details.

For Research Use Only. Not for use in diagnostic or therapeutic procedures.
