NGAL/MMP-9 Complex (NGAL) ELISA Kit for Human

PRODUCT OVERVIEW

Product Name	NGAL/MMP-9 complex, ELISA Kit
Full Product Name	Human NGAL/MMP-9 complex ELISA kit
Product Gene Name	NGAL elisa kit
Product Synonym Names	NGAL/MMP-9 complex; NGAL/MMP-9 complex
Species Reactivity	Human
Samples	Serum, Plasma, Saliva, Cell culture supernates, Tissue homogenates
Detection Range	0.312ng/mL-20ng/mL
Sensitivity	0.029ng/ml
Preparation and Storage	Store at 4 degree C
Sample Volume	50-100ul
Detection Wavelength	450 nm
Related Product Information for NGAL elisa kit	MBS9424611 is a ready-to-use microwell, strip-or-full plate ELISA (enzyme-linked immunosorbent assay) Kit for analyzing the presence of the NGAL/MMP-9 complex, ELISA Kit target analytes in biological samples. The concentration gradients of the kit standards or positive controls render a theoretical kit detection range in biological research samples containing NGAL. The ELISA analytical biochemical technique of the MBS9424611 kit is based on NGAL antibody-NGAL antigen interactions (immunosorbency) and an HRP colorimetric detection system to detect NGAL antigen targets in samples. The ELISA Kit is designed to detect native, not recombinant, NGAL. Appropriate sample types may include undiluted body fluids and/or tissue homogenates, secretions. Quality control assays assessing reproducibility identified the intra-assay CV (%) and inter-assay CV(%).
Other Notes	Small volumes of NGAL elisa kit vial(s) may occasionally become entrapped in the seal of the product vial during shipment and storage. If necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the container`s cap. Certain products may require to ship with dry ice and additional dry ice fee may apply.

For Research Use Only. Not for use in diagnostic or therapeutic procedures.
