AXL Antibody – Rabbit Polyclonal

PRODUCT OVERVIEW

Product Name	AXL, Polyclonal Antibody
Full Product Name	AXL (Phospho-Tyr691) Polyclonal Conjugated Antibody
Product Gene Name	anti-AXL antibody
Product Synonym Names	AXL; UFO; Tyrosine-protein kinase receptor UFO; AXL oncogene
Clonality	Polyclonal
Host	Rabbit
Species Reactivity	Human
Form/Format	0.01M Sodium Phosphate, 0.25M NaCl, pH 7.6, 5mg/ml Bovine Serum Albumin, 0.02% Sodium Azide
Specificity	Phospho-Axl (Y691) polyclonal antibody detects endogenous levels of Axl protein only when phosphorylated at Y691.
Preparation and Storage	Store at 4 degree C for 6 months.
Molecular Weight	99kDa
Chromosome Location	Chromosome: 19; NC_000019.9 (41725108..41767671). Location: 19q13.1
OMIM	109135
3D Structure	ModBase 3D Structure for P30530
Immunogen	Synthesized peptide derived from human Axl around the phosphorylation site of Y691.
Conjugation	Biotin AF350 AF405 AF488 AF555 AF594 AF647 AF680 AF750
Excitation Emission	AF350: 346nm/442nm
Applications Tested/Suitable for anti-AXL antibody	Most Applications
Application Notes for anti-AXL antibody	Suggested Dilution: AF350 conjugated: most applications: 1:50-1:250 AF405 conjugated: most applications: 1:50-1:250 AF488 conjugated: most applications: 1:50-1:250 AF555 conjugated: most applications: 1:50-1:250 AF594 conjugated: most applications: 1:50-1:250 AF647 conjugated: most applications: 1:50-1:250 AF680 conjugated: most applications: 1:50-1:250 AF750 conjugated: most applications: 1:50-1:250 Biotin conjugated: working with enzyme-conjugated streptavidin, most applications: 1:50-1:1000
Related Product Information for anti-AXL antibody	MBS9437698 is an antibody targeting AXL. Also known as AXL (Phospho-Tyr691) Polyclonal Conjugated Antibody. Reactive in Human. Host: Rabbit.
Other Notes	Small volumes of anti-AXL antibody vial(s) may occasionally become entrapped in the seal of the product vial during shipment and storage. If necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the container`s cap. Certain products may require to ship with dry ice and additional dry ice fee may apply.

ADDITIONAL DETAILS

NCBI/Uniprot data below describe general gene information for AXL. It may not necessarily be applicable to this product.

NCBI GI #	21536468
NCBI GeneID	558
NCBI Accession #	NP_001690.2
UniProt Primary Accession #	P30530
UniProt Secondary Accession #	Q8N5L2; Q9UD27
UniProt Related Accession #	P30530
GenBank Nucleotide #	NM_001699.4
NCBI Official Full Name	tyrosine-protein kinase receptor UFO isoform 2
NCBI Official Synonym Full Names	AXL receptor tyrosine kinase
NCBI Official Symbol	AXL
NCBI Official Synonym Symbols	UFO; JTK11
UniProt Protein Name	Tyrosine-protein kinase receptor UFO
UniProt Synonym Protein Names	AXL oncogene
Protein Family	Tyrosine-protein kinase receptor
UniProt Gene Name	AXL
UniProt Synonym Gene Names	UFO
UniProt Entry Name	UFO_HUMAN
NCBI Protein Information	tyrosine-protein kinase receptor UFO; AXL oncogene; oncogene AXL; AXL transforming sequence/gene
NCBI Summary for AXL	The protein encoded by this gene is a member of the receptor tyrosine kinase subfamily. Although it is similar to other receptor tyrosine kinases, this protein represents a unique structure of the extracellular region that juxtaposes IgL and FNIII repeats. It transduces signals from the extracellular matrix into the cytoplasm by binding growth factors like vitamin K-dependent protein growth-arrest-specific gene 6. It is involved in the stimulation of cell proliferation and can also mediate cell aggregation by homophilic binding. Alternatively spliced transcript variants encoding different isoforms have been identified. [provided by RefSeq, Jul 2008]
UniProt Comments for AXL	AXL: a receptor tyrosine kinase that may function as a signal transducer between specific cell types of mesodermal origin. Interacts with SKP1. Overexpression in tissue culture causes oncogenic transformation. Overexpressed in several cancers including thyroid, ovarian, gastric, ER+ breast cancer and acute myeloid leukemia, where it is associated with poor prognosis. 2 isoforms of the human protein are produced by alternative splicing. Protein type: Membrane protein, integral; Kinase, protein; Protein kinase, tyrosine (receptor); EC 2.7.10.1; Oncoprotein; Protein kinase, TK; TK group; Axl family Chromosomal Location of Human Ortholog: 19q13.1 Cellular Component: extracellular space; cell surface; integral to plasma membrane; plasma membrane Molecular Function: protein binding; phosphatidylserine binding; protein heterodimerization activity; protein-tyrosine kinase activity; phosphoinositide 3-kinase binding; transmembrane receptor protein tyrosine kinase activity; ATP binding; myosin heavy chain binding Biological Process: forebrain cell migration; negative regulation of lymphocyte activation; platelet activation; organ regeneration; peptidyl-tyrosine phosphorylation; cell maturation; neuron migration; vagina development; negative regulation of tumor necrosis factor production; signal transduction; phagocytosis; positive regulation of natural killer cell differentiation; erythrocyte homeostasis; positive regulation of protein kinase B signaling cascade; ovulation cycle; natural killer cell differentiation; negative regulation of interferon-gamma production; protein kinase B signaling cascade; cellular response to extracellular stimulus; innate immune response; blood vessel remodeling; spermatogenesis; negative regulation of neuron apoptosis; positive regulation of cytokine and chemokine mediated signaling pathway; inflammatory response; vascular endothelial growth factor receptor signaling pathway; apoptotic cell clearance; secretion by cell

Research Articles on AXL	**1.** The Axl receptor shedding is an active process affected and influenced by the Gas6-mediated Axl-signaling in systemic lupus erythematosus and Behcets disease.
Precautions	All of MyBioSource's Products are for scientific laboratory research purposes and are not for diagnostic, therapeutics, prophylactic or in vivo use. Through your purchase, you expressly represent and warrant to MyBioSource that you will properly test and use any Products purchased from MyBioSource in accordance with industry standards. MyBioSource and its authorized distributors reserve the right to refuse to process any order where we reasonably believe that the intended use will fall outside of our acceptable guidelines.
Disclaimer	While every efforts were made to ensure the accuracy of the information provided in this datasheet, MyBioSource will not be liable for any omissions or errors contained herein. MyBioSource reserves the right to make changes to this datasheet at any time without prior notice. It is the responsibility of the customer to report product performance issues to MyBioSource within 30 days of receipt of the product. Please visit our Terms & Conditions page for more information.
Product Note	Select online data sheet information is drawn from bioinformatics databases, occasionally resulting in ambiguous or non-relevant product information. It is the responsibility of the customer to review, verify, and evaluate the information to make sure it matches their requirements before purchasing the kit. Our ELISA Kit assays are dynamic research tools and sometimes they may be updated and improved. If the format of this assay is important to you then please request the current manual or contact our technical support team with a presales inquiry before placing an order. We will confirm the current details of the assay. We cannot guarantee the sample manual posted online is the most current manual, it is intended to serve as an example only. Please refer to the instructions For Use provided with the assay kit for precise details.

For Research Use Only. Not for use in diagnostic or therapeutic procedures.
