ADORA1 Antibody – Rabbit Polyclonal

PRODUCT OVERVIEW

Product Name	ADORA1, Polyclonal Antibody
Full Product Name	ADORA1 Rabbit Polyclonal Antibody
Product Gene Name	anti-ADORA1 antibody
Product Synonym Names	RDC7; ADORA1
Clonality	Polyclonal
Isotype	IgG
Host	Rabbit
Species Reactivity	Human, Mouse, Rat
Form/Format	Buffer: PBS with 0.02% sodium azide, 50% glycerol, pH7.3.
Purity/Purification	Affinity purification
Preparation and Storage	Store at -20 degree C. Avoid freeze/thaw cycles.
Molecular Weight	36,512 Da
Chromosome Location	Chromosome: 1; NC_000001.10 (203096836..203136533). Location: 1q32.1
OMIM	102775
3D Structure	ModBase 3D Structure for P30542
Immunogen	Recombinant protein of human ADORA1.
Product Categories/Family for anti-ADORA1 antibody	Primary Antibody
Applications Tested/Suitable for anti-ADORA1 antibody	Western Blot (WB), Immunohistochemistry (IHC)
Application Notes for anti-ADORA1 antibody	WB: 1:2000-1:5000 IHC: 1:50-1:200
Related Product Information for anti-ADORA1 antibody	MBS9465693 is an antibody targeting ADORA1. Also known as ADORA1 Rabbit Polyclonal Antibody. Reactive in Human, Mouse, Rat. Host: Rabbit.
Other Notes	Small volumes of anti-ADORA1 antibody vial(s) may occasionally become entrapped in the seal of the product vial during shipment and storage. If necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the container`s cap. Certain products may require to ship with dry ice and additional dry ice fee may apply.

ADDITIONAL DETAILS

NCBI/Uniprot data below describe general gene information for ADORA1. It may not necessarily be applicable to this product.

NCBI GI #	4501947
NCBI GeneID	134
NCBI Accession #	NP_000665.1
UniProt Primary Accession #	P30542

UniProt Secondary Accession #	Q6FHK3; Q8TAM8; A6NFY5; A6NGP4; A8K1L3; B3KXQ4
UniProt Related Accession #	P30542
GenBank Nucleotide #	NM_000674.2
NCBI Official Full Name	adenosine receptor A1
NCBI Official Synonym Full Names	adenosine A1 receptor
NCBI Official Symbol	ADORA1
NCBI Official Synonym Symbols	RDC7
UniProt Protein Name	Adenosine receptor A1
Protein Family	Adenosine receptor
UniProt Gene Name	ADORA1
UniProt Entry Name	AA1R_HUMAN
NCBI Protein Information	adenosine receptor A1
NCBI Summary for ADORA1	The protein encoded by this gene is an adenosine receptor that belongs to the G-protein coupled receptor 1 family. There are 3 types of adenosine receptors, each with a specific pattern of ligand binding and tissue distribution, and together they regulate a diverse set of physiologic functions. The type A1 receptors inhibit adenylyl cyclase, and play a role in the fertilization process. Animal studies also suggest a role for A1 receptors in kidney function and ethanol intoxication. Transcript variants with alternative splicing in the 5' UTR have been found for this gene. [provided by RefSeq, Jul 2008]
UniProt Comments for ADORA1	ADORA1: Receptor for adenosine. The activity of this receptor is mediated by G proteins which inhibit adenylyl cyclase. Belongs to the G-protein coupled receptor 1 family. 2 isoforms of the human protein are produced by alternative splicing. Protein type: Membrane protein, integral; Receptor, GPCR; Membrane protein, multi-pass; GPCR, family 1; Apoptosis; Endoplasmic reticulum Chromosomal Location of Human Ortholog: 1q32.1 Cellular Component: asymmetric synapse; presynaptic membrane; postsynaptic membrane; cell soma; endoplasmic reticulum; basolateral plasma membrane; integral to plasma membrane; postsynaptic density; presynaptic active zone; plasma membrane; dendritic spine; terminal button; axolemma Molecular Function: protein binding; G-protein-coupled receptor binding; protein heterodimerization activity; G-protein beta/gamma-subunit binding; purine nucleoside binding; adenosine receptor activity, G-protein coupled; phospholipase C activity; heterotrimeric G-protein binding Biological Process: negative regulation of circadian sleep/wake cycle, non-REM sleep; relaxation of vascular smooth muscle; activation of MAPKK activity; negative regulation of glutamate secretion; negative regulation of hormone secretion; positive regulation of potassium ion transport; regulation of synaptic plasticity; positive regulation of peptide secretion; neurological control of breathing; thermoregulation; signal transduction; positive regulation of protein amino acid dephosphorylation; negative regulation of cell proliferation; regulation of glomerular filtration; cell-cell signaling; positive regulation of nucleoside transport; positive regulation of epidermal growth factor receptor activity; negative regulation of lipid catabolic process; negative regulation of vasodilation; negative regulation of blood pressure; detection of temperature stimulus involved in sensory perception of pain; protein targeting to membrane; inflammatory response; negative regulation of synaptic transmission, GABAergic; adenosine receptor signaling pathway; nervous system development; negative regulation of neurotrophin production; negative regulation of synaptic transmission, glutamatergic; negative regulation of acute inflammatory response; negative regulation of leukocyte migration; phagocytosis; response to hypoxia; G-protein signaling, adenylate cyclase inhibiting pathway; regulation of sensory perception of pain; regulation of excitatory postsynaptic membrane potential; cognition; positive regulation of blood pressure; lipid catabolic process; negative regulation of apoptosis
Research Articles on ADORA1	**1.** ADA open form, but not the closed one, that is responsible for the functional interaction with AR and AAR.

Precautions	All of MyBioSource's Products are for scientific laboratory research purposes and are not for diagnostic, therapeutics, prophylactic or in vivo use. Through your purchase, you expressly represent and warrant to MyBioSource that you will properly test and use any Products purchased from MyBioSource in accordance with industry standards. MyBioSource and its authorized distributors reserve the right to refuse to process any order where we reasonably believe that the intended use will fall outside of our acceptable guidelines.
Disclaimer	While every efforts were made to ensure the accuracy of the information provided in this datasheet, MyBioSource will not be liable for any omissions or errors contained herein. MyBioSource reserves the right to make changes to this datasheet at any time without prior notice. It is the responsibility of the customer to report product performance issues to MyBioSource within 30 days of receipt of the product. Please visit our Terms & Conditions page for more information.
Product Note	Select online data sheet information is drawn from bioinformatics databases, occasionally resulting in ambiguous or non-relevant product information. It is the responsibility of the customer to review, verify, and evaluate the information to make sure it matches their requirements before purchasing the kit. Our ELISA Kit assays are dynamic research tools and sometimes they may be updated and improved. If the format of this assay is important to you then please request the current manual or contact our technical support team with a presales inquiry before placing an order. We will confirm the current details of the assay. We cannot guarantee the sample manual posted online is the most current manual, it is intended to serve as an example only. Please refer to the instructions For Use provided with the assay kit for precise details.

For Research Use Only. Not for use in diagnostic or therapeutic procedures.
