PI3R6 Antibody – Rabbit Polyclonal

PRODUCT OVERVIEW

Product Name	PI3R6, Polyclonal Antibody
Full Product Name	PI3R6 Rabbit Polyclonal Antibody
Product Gene Name	anti-PI3R6 antibody
Product Synonym Gene Name	PIK3R6, C17orf38
Product Synonym Names	BH6842; Phosphoinositide 3-kinase regulatory subunit 6 (Phosphoinositide 3-kinase gamma adapter protein of 87 kDa)(p84 PI3K adapter protein)(p84 PIKAP)(p87 PI3K adapter protein)(p87PIKAP)
Clonality	Polyclonal
Host	Rabbit
Species Reactivity	Human, Rat, Mouse
Form/Format	Liquid in PBS containing 50% glycerol, and 0.02% sodium azide.
Purity/Purification	The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen.
Concentration	1mg/ml (lot specific)
Specificity	PI3R6 Polyclonal Antibody detects endogenous levels of protein.
Preparation and Storage	Store at -20 degree C/1 year
Molecular Weight	84,258 Da
OMIM	AY753192 mRNA
3D Structure	ModBase 3D Structure for Q5UE93
Immunogen	Synthesized peptide derived from human protein. at AA range: 280-360
Modification	Unmodified/Total
Applications Tested/Suitable for anti-PI3R6 antibody	Western Blot (WB), ELISA (EIA)
Application Notes for anti-PI3R6 antibody	WB: 1:500-2000 ELISA: 1:5000-20000
Related Product Information for anti-PI3R6 antibody	Phosphoinositide 3-kinase gamma is a lipid kinase that produces the lipid second messenger phosphatidylinositol 3,4,5-trisphosphate. The kinase is composed of a catalytic subunit and one of several regulatory subunits, and is chiefly activated by G protein-coupled receptors. This gene encodes a regulatory subunit, and is distantly related to the phosphoinositide-3-kinase, regulatory subunit 5 gene which is located adjacent to this gene on chromosome 7. The orthologous protein in the mouse binds to both the catalytic subunit and to G (beta/gamma), and mediates activation of the kinase subunit downstream of G protein-coupled receptors. Alternative splicing results in multiple transcript variants. [provided by RefSeq, Feb 2014]
Other Notes	Small volumes of anti-PI3R6 antibody vial(s) may occasionally become entrapped in the seal of the product vial during shipment and storage. If necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the container`s cap. Certain products may require to ship with dry ice and additional dry ice fee may apply.
Searchable Terms for PI3R6 purchase	MBS9516252 is an antibody targeting PI3R6. Also known as PI3R6 Rabbit Polyclonal Antibody. Reactive in Human, Rat, Mouse. Host: Rabbit.

ADDITIONAL DETAILS

NCBI/Uniprot data below describe general gene information for PI3R6. It may not necessarily be applicable to this product.

NCBI GI #	58082081
NCBI GeneID	146850
NCBI Accession #	NP_001010855.1
UniProt Primary Accession #	Q5UE93
UniProt Secondary Accession #	Q658R3
UniProt Related Accession #	Q5UE93
GenBank Nucleotide #	NM_001010855.3
NCBI Official Full Name	phosphoinositide 3-kinase regulatory subunit 6 isoform 1
NCBI Official Synonym Full Names	phosphoinositide-3-kinase regulatory subunit 6
NCBI Official Symbol	PIK3R6
NCBI Official Synonym Symbols	C17orf38; HsT41028; p87PIKAP; p84 PIKAP; p87(PIKAP)
UniProt Protein Name	Phosphoinositide 3-kinase regulatory subunit 6
UniProt Synonym Protein Names	Phosphoinositide 3-kinase gamma adapter protein of 87 kDa; p84 PI3K adapter protein; p84 PIKAP; p87 PI3K adapter protein; p87PIKAP
UniProt Gene Name	PIK3R6
UniProt Synonym Gene Names	C17orf38; p84 PIKAP; p87PIKAP
NCBI Protein Information	phosphoinositide 3-kinase regulatory subunit 6
NCBI Summary for PI3R6	Phosphoinositide 3-kinase gamma is a lipid kinase that produces the lipid second messenger phosphatidylinositol 3,4,5-trisphosphate. The kinase is composed of a catalytic subunit and one of several regulatory subunits, and is chiefly activated by G protein-coupled receptors. This gene encodes a regulatory subunit, and is distantly related to the phosphoinositide-3-kinase, regulatory subunit 5 gene which is located adjacent to this gene on chromosome 7. The orthologous protein in the mouse binds to both the catalytic subunit and to G(beta/gamma), and mediates activation of the kinase subunit downstream of G protein-coupled receptors. Alternative splicing results in multiple transcript variants. [provided by RefSeq, Feb 2014]
UniProt Comments for PI3R6	PIK3R6: Regulatory subunit of the PI3K gamma complex. Acts as an adapter to drive activation of PIK3CG by beta-gamma G protein dimers. The PIK3CG:PIK3R6 heterodimer is much less sensitive to beta-gamma G protein dimers than PIK3CG:PIK3R5 and its membrane recruitment and beta-gamma G protein dimer-dependent activation requires HRAS1 bound to PIK3CG. Recruits of the PI3K gamma complex to a PDE3B:RAPGEF3 signaling complex involved in angiogenesis; signaling seems to involve RRAS. Chromosomal Location of Human Ortholog: 17p13.1 Cellular Component: cytosol; membrane; phosphoinositide 3-kinase complex; plasma membrane Molecular Function: 1-phosphatidylinositol-3-kinase regulator activity; phosphatidylinositol-4,5-bisphosphate 3-kinase activity; protein binding Biological Process: angiogenesis; G-protein coupled receptor signaling pathway; phosphatidylinositol biosynthetic process; phosphatidylinositol phosphorylation; phosphoinositide 3-kinase cascade; platelet activation; positive regulation of angiogenesis; positive regulation of MAP kinase activity; positive regulation of T cell differentiation; regulation of natural killer cell mediated cytotoxicity; regulation of phosphoinositide 3-kinase activity
Research Articles on PI3R6	**1.** Our findings suggest that p84 binding to p110gamma may represent a novel negative feedback signal that terminates PI3Kgamma activity.

Precautions	All of MyBioSource's Products are for scientific laboratory research purposes and are not for diagnostic, therapeutics, prophylactic or in vivo use. Through your purchase, you expressly represent and warrant to MyBioSource that you will properly test and use any Products purchased from MyBioSource in accordance with industry standards. MyBioSource and its authorized distributors reserve the right to refuse to process any order where we reasonably believe that the intended use will fall outside of our acceptable guidelines.
Disclaimer	While every efforts were made to ensure the accuracy of the information provided in this datasheet, MyBioSource will not be liable for any omissions or errors contained herein. MyBioSource reserves the right to make changes to this datasheet at any time without prior notice. It is the responsibility of the customer to report product performance issues to MyBioSource within 30 days of receipt of the product. Please visit our Terms & Conditions page for more information.
Product Note	Select online data sheet information is drawn from bioinformatics databases, occasionally resulting in ambiguous or non-relevant product information. It is the responsibility of the customer to review, verify, and evaluate the information to make sure it matches their requirements before purchasing the kit. Our ELISA Kit assays are dynamic research tools and sometimes they may be updated and improved. If the format of this assay is important to you then please request the current manual or contact our technical support team with a presales inquiry before placing an order. We will confirm the current details of the assay. We cannot guarantee the sample manual posted online is the most current manual, it is intended to serve as an example only. Please refer to the instructions For Use provided with the assay kit for precise details.

For Research Use Only. Not for use in diagnostic or therapeutic procedures.
