DOCK8 Antibody – Rabbit Polyclonal

PRODUCT OVERVIEW

Product Name	DOCK8, Polyclonal Antibody
Full Product Name	DOCK8 Antibody
Product Gene Name	anti-DOCK8 antibody
Product Synonym Names	Dedicator of cytokinesis protein 8
Clonality	Polyclonal
Isotype	Rabbit IgG
Host	Rabbit
Species Reactivity	Human, Mouse
Form/Format	Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.
Purity/Purification	The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen.
Concentration	1mg/ml (lot specific)
Specificity	This antibody detects endogenous levels of DOCK8 at Human, Mouse
Preparation and Storage	Store at -20 degree C/1 year
Molecular Weight	238,529 Da
OMIM	243700
3D Structure	ModBase 3D Structure for Q8NF50
Immunogen	Synthesized peptide derived from human DOCK8
Modification	Unmodified/Total
Product Categories/Family for anti-DOCK8 antibody	Primary Antibodies
Applications Tested/Suitable for anti-DOCK8 antibody	Western Blot (WB)
Application Notes for anti-DOCK8 antibody	WB: 1:500-2000
Related Product Information for anti-DOCK8 antibody	MBS9521828 is an antibody targeting DOCK8. Also known as DOCK8 Antibody. Reactive in Human, Mouse. Host: Rabbit.
Other Notes	Small volumes of anti-DOCK8 antibody vial(s) may occasionally become entrapped in the seal of the product vial during shipment and storage. If necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the container`s cap. Certain products may require to ship with dry ice and additional dry ice fee may apply.

ADDITIONAL DETAILS

NCBI/Uniprot data below describe general gene information for DOCK8. It may not necessarily be applicable to this product.

NCBI GI #	302129691
NCBI GeneID	81704

NCBI Accession #	NP_001180465.1
UniProt Primary Accession #	Q8NF50
UniProt Secondary Accession #	Q3MV16; Q5JPJ1; Q8TEP1; Q8WUY2; Q9BYJ5; Q9H1Q2; A2A350; A2BDF2; A4FU78; B7ZLP0; E9PH09
UniProt Related Accession #	Q8NF50
GenBank Nucleotide #	NM_001193536.1
NCBI Official Full Name	dedicator of cytokinesis protein 8 isoform 3
NCBI Official Synonym Full Names	dedicator of cytokinesis 8
NCBI Official Symbol	DOCK8
NCBI Official Synonym Symbols	MRD2; ZIR8; HEL-205
UniProt Protein Name	Dedicator of cytokinesis protein 8
Protein Family	Dedicator of cytokinesis protein
UniProt Gene Name	DOCK8
UniProt Entry Name	DOCK8_HUMAN
NCBI Protein Information	dedicator of cytokinesis protein 8; 1200017A24Rik; epididymis luminal protein 205
NCBI Summary for DOCK8	This gene encodes a member of the DOCK180 family of guanine nucleotide exchange factors. Guanine nucleotide exchange factors interact with Rho GTPases and are components of intracellular signaling networks. Mutations in this gene result in the autosomal recessive form of the hyper-IgE syndrome. Alternatively spliced transcript variants encoding different isoforms have been described.[provided by RefSeq, Jun 2010]
UniProt Comments for DOCK8	DOCK8: Potential guanine nucleotide exchange factor (GEF). GEF proteins activate some small GTPases by exchanging bound GDP for free GTP. Defects in DOCK8 are the cause of hyperimmunoglobulin E recurrent infection syndrome autosomal recessive (AR-HIES). It is a rare disorder of immunity characterized by immunodeficiency, recurrent infections, eczema, increased serum IgE, eosinophilia and lack of connective tissue and skeletal involvement. Defects in DOCK8 are the cause of mental retardation autosomal dominant type 2 (MRD2). Mental retardation is characterized by significantly below average general intellectual functioning associated with impairments in adaptative behavior and manifested during the developmental period. A chromosomal aberration disrupting DOCK8 has been found in a patient with mental retardation and ectodermal dysplasia. DOCK8 is disrupted in patients with mental retardation. A balanced translocation, t(X;9) (q13.1;p24). Belongs to the DOCK family. 3 isoforms of the human protein are produced by alternative splicing. Protein type: GEFs; GEFs, misc.; Motility/polarity/chemotaxis Chromosomal Location of Human Ortholog: 9p24.3 Cellular Component: membrane; leading edge; cytosol Molecular Function: protein binding; guanyl-nucleotide exchange factor activity Biological Process: formation of immunological synapse; small GTPase mediated signal transduction; blood coagulation; positive regulation of GTPase activity Disease: Mental Retardation, Autosomal Dominant 2; Hyper-ige Recurrent Infection Syndrome, Autosomal Recessive
Research Articles on DOCK8	**1.** Two novel large deletions, del1-14 exons and del8-18 exons, of DOCK8 have been identified in two siblings with the adaptive immune deficiencies.
Precautions	All of MyBioSource's Products are for scientific laboratory research purposes and are not for diagnostic, therapeutics, prophylactic or in vivo use. Through your purchase, you expressly represent and warrant to MyBioSource that you will properly test and use any Products purchased from MyBioSource in accordance with industry standards. MyBioSource and its authorized distributors reserve the right to refuse to process any order where we reasonably believe that the intended use will fall outside of our acceptable guidelines.

Disclaimer	While every efforts were made to ensure the accuracy of the information provided in this datasheet, MyBioSource will not be liable for any omissions or errors contained herein. MyBioSource reserves the right to make changes to this datasheet at any time without prior notice. It is the responsibility of the customer to report product performance issues to MyBioSource within 30 days of receipt of the product. Please visit our Terms & Conditions page for more information.
Product Note	Select online data sheet information is drawn from bioinformatics databases, occasionally resulting in ambiguous or non-relevant product information. It is the responsibility of the customer to review, verify, and evaluate the information to make sure it matches their requirements before purchasing the kit. Our ELISA Kit assays are dynamic research tools and sometimes they may be updated and improved. If the format of this assay is important to you then please request the current manual or contact our technical support team with a presales inquiry before placing an order. We will confirm the current details of the assay. We cannot guarantee the sample manual posted online is the most current manual, it is intended to serve as an example only. Please refer to the instructions For Use provided with the assay kit for precise details.

For Research Use Only. Not for use in diagnostic or therapeutic procedures.
