Methionyl Aminopeptidase 2 (METAP2) ELISA Kit for Hamster

PRODUCT OVERVIEW

Product Name	Methionyl Aminopeptidase 2 (METAP2), ELISA Kit
Full Product Name	Hamster Methionyl Aminopeptidase 2 ELISA Kit
Product Gene Name	METAP2 elisa kit
Species Reactivity	Hamster
Preparation and Storage	Store all reagents at 2-8 degree C
Related Product Information for METAP2 elisa kit	MBS097183 is a ready-to-use microwell, strip plate ELISA (enzyme-linked immunosorbent assay) Kit for analyzing the presence of the Methionyl Aminopeptidase 2 (METAP2) ELISA Kit target analytes in biological samples. The concentration gradients of the kit standards or positive controls render a theoretical kit detection range in biological research samples containing METAP2. The ELISA analytical biochemical technique of the MBS097183 kit is based on METAP2 antibody-METAP2 antigen interactions (immunosorbency) and an HRP colorimetric detection system to detect METAP2 antigen targets in samples. The ELISA Kit is designed to detect native, not recombinant, METAP2. Appropriate sample types may include undiluted body fluids and/or tissue homogenates, secretions. Quality control assays assessing reproducibility identified the intra-assay CV (%) and inter-assay CV(%).
Other Notes	Small volumes of METAP2 elisa kit vial(s) may occasionally become entrapped in the seal of the product vial during shipment and storage. If necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the container`s cap. Certain products may require to ship with dry ice and additional dry ice fee may apply.

For Research Use Only. Not for use in diagnostic or therapeutic procedures.
