Immunoglobulin Lambda-Like Polypeptide 1 (IgLL1) ELISA Kit for Sheep

PRODUCT OVERVIEW

Product Name	Immunoglobulin Lambda-Like Polypeptide 1 (IgLL1), ELISA Kit
Full Product Name	Sheep Immunoglobulin Lambda-Like Polypeptide 1 (IgLL1) ELISA Kit
Product Gene Name	IgLL1 elisa kit
Species Reactivity	Sheep
Preparation and Storage	Store all reagents at 2-8 degree C
Molecular Weight	8,574 Da
OMIM	M27749 mRNA
3D Structure	ModBase 3D Structure for P15814
Related Product Information for IgLL1 elisa kit	MBS9906498 is a ready-to-use microwell, strip plate ELISA (enzyme-linked immunosorbent assay) Kit for analyzing the presence of the Immunoglobulin Lambda-Like Polypeptide 1 (IgLL1) ELISA Kit target analytes in biological samples. The concentration gradients of the kit standards or positive controls render a theoretical kit detection range in biological research samples containing IgLL1. The ELISA analytical biochemical technique of the MBS9906498 kit is based on IgLL1 antibody-IgLL1 antigen interactions (immunosorbency) and an HRP colorimetric detection system to detect IgLL1 antigen targets in samples. The ELISA Kit is designed to detect native, not recombinant, IgLL1. Appropriate sample types may include undiluted body fluids and/or tissue homogenates, secretions. Quality control assays assessing reproducibility identified the intra-assay CV (%) and inter-assay CV(%).
Other Notes	Small volumes of IgLL1 elisa kit vial(s) may occasionally become entrapped in the seal of the product vial during shipment and storage. If necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the container`s cap. Certain products may require to ship with dry ice and additional dry ice fee may apply.

ADDITIONAL DETAILS

NCBI/Uniprot data below describe general gene information for IgLL1. It may not necessarily be applicable to this product.

NCBI GI #	13399298
NCBI GeneID	3543
NCBI Accession #	NP_064455.1
UniProt Primary Accession #	P15814
UniProt Secondary Accession #	Q0P681
UniProt Related Accession #	P15814
GenBank Nucleotide #	NM_020070.3
NCBI Official Full Name	immunoglobulin lambda-like polypeptide 1 isoform a
NCBI Official Synonym Full Names	immunoglobulin lambda like polypeptide 1
NCBI Official Symbol	IGLL1
NCBI Official Synonym Symbols	IGO; 14.1; AGM2; IGL1; IGL5; IGLL; IGVPB; CD179b; VPREB2; IGLJ14.1
UniProt Protein Name	Immunoglobulin lambda-like polypeptide 1
UniProt Synonym Protein Names	CD179 antigen-like family member B; Ig lambda-5; Immunoglobulin omega polypeptide; Immunoglobulin-related protein 14.1; CD_antigen: CD179b

Protein Family	Immunoglobulin lambda-like polypeptide
UniProt Gene Name	IGLL1
UniProt Synonym Gene Names	IGL1
NCBI Protein Information	immunoglobulin lambda-like polypeptide 1
NCBI Summary for IgLL1	The preB cell receptor is found on the surface of proB and preB cells, where it is involved in transduction of signals for cellular proliferation, differentiation from the proB cell to the preB cell stage, allelic exclusion at the Ig heavy chain gene locus, and promotion of Ig light chain gene rearrangements. The preB cell receptor is composed of a membrane-bound Ig mu heavy chain in association with a heterodimeric surrogate light chain. This gene encodes one of the surrogate light chain subunits and is a member of the immunoglobulin gene superfamily. This gene does not undergo rearrangement. Mutations in this gene can result in B cell deficiency and agammaglobulinemia, an autosomal recessive disease in which few or no gamma globulins or antibodies are made. Two transcript variants encoding different isoforms have been found for this gene. [provided by RefSeq, Jul 2008]
UniProt Comments for IgLL1	IGLL1: Critical for B-cell development. Defects in IGLL1 are the cause of agammaglobulinemia type 2 (AGM2). It is a primary immunodeficiency characterized by profoundly low or absent serum antibodies and low or absent circulating B-cells due to an early block of B-cell development. Affected individuals develop severe infections in the first years of life. 2 isoforms of the human protein are produced by alternative splicing. Protein type: Secreted; Secreted, signal peptide Chromosomal Location of Human Ortholog: 22q11.23 Cellular Component: external side of plasma membrane; extracellular region; membrane Molecular Function: antigen binding Biological Process: B cell receptor signaling pathway; complement activation, classical pathway; defense response to bacterium; immune response; innate immune response; leukocyte migration; phagocytosis, engulfment; phagocytosis, recognition; positive regulation of B cell activation Disease: Agammaglobulinemia 2, Autosomal Recessive

Precautions	All of MyBioSource's Products are for scientific laboratory research purposes and are not for diagnostic, therapeutics, prophylactic or in vivo use. Through your purchase, you expressly represent and warrant to MyBioSource that you will properly test and use any Products purchased from MyBioSource in accordance with industry standards. MyBioSource and its authorized distributors reserve the right to refuse to process any order where we reasonably believe that the intended use will fall outside of our acceptable guidelines.
Disclaimer	While every efforts were made to ensure the accuracy of the information provided in this datasheet, MyBioSource will not be liable for any omissions or errors contained herein. MyBioSource reserves the right to make changes to this datasheet at any time without prior notice. It is the responsibility of the customer to report product performance issues to MyBioSource within 30 days of receipt of the product. Please visit our Terms & Conditions page for more information.
Product Note	Select online data sheet information is drawn from bioinformatics databases, occasionally resulting in ambiguous or non-relevant product information. It is the responsibility of the customer to review, verify, and evaluate the information to make sure it matches their requirements before purchasing the kit. Our ELISA Kit assays are dynamic research tools and sometimes they may be updated and improved. If the format of this assay is important to you then please request the current manual or contact our technical support team with a presales inquiry before placing an order. We will confirm the current details of the assay. We cannot guarantee the sample manual posted online is the most current manual, it is intended to serve as an example only. Please refer to the instructions For Use provided with the assay kit for precise details.

For Research Use Only. Not for use in diagnostic or therapeutic procedures.
